Chan Tsz Ching, Angus

Analyst Programmer

chantszching1109@gmail.com • id506507.github.io

SUMMARY

- Experienced programmer with 6 years in developing and revamping systems.
- Proven track record in both front-end and back-end development.
- Skilled in RPA implementation and data retrieval automation, significantly enhancing workflow efficiency.
- Adept at providing production support and performing system enhancements.

EXPERIENCE

Analyst Programmer 2026.02 – Present

BOCI-Prudential Trustee Limited

- Supported daily operations of the asset management processes, including data validation, report generation, and issue resolution, while ensuring high data accuracy and operational stability.
- Developed Python automation tool for efficient file handling and transmission, reducing manual effort while improving speed and reliability.
- Enhanced existing workflows using C#, Python, SQL, and Stored Procedures, significantly reducing manual operations and minimizing errors in business processes.
- Maintained existing systems using Visual Basic (VB) WinForms.
- Secondment Contract Role from ICO Limited.

Analyst Programmer 2022.03 – 2025.03

Konew FinTech Corporation Limited

- Successfully revamped Loan Systems (used for over 20 years) into a Centralized Loan System in one year, developed using Java Spring Boot, Angular, SQL, Redis and Azure Cloud. Participating in both front-end and back-end development. This transformation aimed to enhance employee efficiency and streamline company operations.
- Developed and maintained various RPA solutions to enhance data retrieval and processing efficiency.
    - Owner of the RPA module of the Centralized Loan System, developed using Java. This module automated the retrieval of property valuations and property reference number (PRN), significantly improving the efficiency of the loan approval process.
    - Maintained a TU RPA that utilizes Python and Selenium to obtain TransUnion Credit Reports.
    - Assisted Transition from TransUnion to Multiple Credit Reference Agencies (MCRA). Revamped TU RPA to schedule job using SFTP and API. Successfully reducing the wait time for credit reports by 50% and minimizing errors in data processing.
    - Developed a land search RPA. Use Selenium to get information about residential units.
- Owner of a schedule job platform for legacy system, developed using C#. This platform implemented a batch Excel reader, automatic email reminders, generated reports, and updated data to database for internal user. This platform enhanced operational efficiency and streamlined data management processes.

Senior Programmer
Programmer 2020.07 – 2021.09
2019.04 – 2020.06
Centaline Data Technology Limited

- Developed a map view property searching website using Google Maps API and Nuxt.js, making it easier for customers to visualize property distribution.
- Revamped Centaline City Leading Index website. Developed a user-friendly platform for internal users to upload data efficiently using .NET MVC. Created APIs to facilitate real-time data retrieval and integration, ensuring timely updates for website display thereby enhancing data clarity for customers and simplifying data management for internal users using C#.
- Revamped property searching website using Nuxt.js, enhance customer property search experience.
- Enhanced API to support multilingual capabilities.

Web Developer 2018.09 – 2018.12
Freelance

- Revamped eBay Automotive Parts Sales Website from scratch using plain HTML and CSS, assisting the store in showcasing new products and expediting customers' ability to find the items they want.

SKILLS

Backend Development

- Java Spring Boot
- Python
- Redis
- Restful API
- C# .NET / .NET Core
- SQL (MS SQL, PostgreSQL, MySQL)
- MVC

Frontend Development

- Angular
- HTML
- CSS
- Vue.js / Nuxt.js
- TypeScript / JavaScript

Cloud, Search & Automation

- Azure Cloud
- Selenium
- Elasticsearch

EDUCATION

Computer Science and Engineering 2014.09 – 2018.06
National Chung Hsing University

- Served as a Network Administrator during studies, assisting in managing dormitory networks, troubleshooting connectivity issues for resident students, and communicating with the university to improve overall network usage experience. This educational qualification meets the standard of a local Bachelor (Honours) at Level 5 of the Hong Kong Qualifications Framework certified by the Hong Kong Council for Accreditation of Academic and Vocational Qualifications.
